

SERVICE SOLUTIONS // FAT-O-MEAT'ER II™

GUARANTEED CONTINUOUS PRECISION

To guarantee a continuous precision of the data measured with your Fat-O Meat'er™ we recommend signing a service agreement covering 2 yearly services of your probe. To ensure you always have a probe providing you with precise measurements, also while one is at service, it is of utmost importance that you have an extra probe in stock.

By including both your probes in the service agreement, you ensure a high level of equipment efficiency and long life-time of your probes.

EU regulations require the morning test to be passed prior to daily measurements and for this to be passed easily, your probe and test block should be in good condition. To assure this, we recommend including your test block to the service agreement, ensuring you an exchange of a newly calibrated test block, just before the current test block is at the end of its calibration period.

Do not hesitate to contact us for more information.

Value for you!

- Fast return on investment
- Maximize yield
- Increased product life-time
- Secure data collection
- Precision in payment
- Cost efficiency
